Connecting the Dots:
# Data Risk Assessment

Normalyze®

Get a Clear Picture of Your Data Security Posture

In today's diverse IT environments, securing data across multiple platforms—be it in SaaS, PaaS, public or multi-cloud, on-prem or hybrid environments—is more critical than ever. The Normalyze Data Risk Assessment service is meticulously designed to identify, analyze, and prioritize risks across complex data landscapes, giving you practical insights and remediation recommendations to protect your sensitive data.

A Tailored, Expert-Driven Approach

The Normalyze Data Risk Assessment service systematically examines your organization's data handling and security posture. From initial data discovery to detailed compliance checks, we give you visibility into areas of your data like you've never seen before.

- **Comprehensive Data Discovery**
  Leveraging advanced tools, we perform deep scans across environments like AWS, Azure, GCP, Snowflake and on-premises databases to locate and catalog all data assets.

- **Accurate Data Classification**
  We classify data to understand sensitivity levels, helping prioritize security measures based on potential risks.

- **Risk Evaluation**
  By identifying vulnerabilities and potential entry points, we assess your exposure and the effectiveness of existing controls.

Discover and classify data
Continuous scanning
Customizable workflows
Accurate classification
AI-generated recommendations
Normalyze®
Assess and prioritize risks
Remediate and prevent issues
Risk quantification / prioritization
Risk paths and access graphs

The Value of a Data Risk Assessment

Our Data Risk Assessment goes beyond traditional security evaluations by focusing on a data-centric approach to security and compliance.

- **Enhanced Data Visibility**
  We uncover hidden data stores and dormant privileges, reducing the risk of unauthorized access or data breaches.

- **Customized Security Strategies**
  We provide tailored recommendations to strengthen your data security based on your data's unique characteristics and business needs.

- **Confidence in Compliance**
  With detailed assessments, we help you navigate the complex landscape of data regulations, ensuring your data governance aligns with current laws.

Answers in Three Easy Steps

1. **Kick-off and Customization**
   We begin by understanding your specific data environments and security requirements.

2. **In-Depth Analysis**
   We compile a comprehensive overview of your data assets and their security through a series of advanced scans and evaluations.

3. **Reporting and Recommendations**
   You receive a detailed report within five business days that outlines findings, highlights risks, and suggests actionable remediation steps.

Deliverables include:

- A full inventory of data assets, classified by sensitivity and value
- Analysis of data access and privilege settings
- Report of compliance gaps and security vulnerabilities
- Strategic action plan for mitigating identified risks

How We Help You

Choosing our Data Risk Assessment empowers your organization to proactively manage data risks, optimize compliance, and enhance overall security.

- **Risk Mitigation**
  Proactively address vulnerabilities before they can be exploited.

- **Cost Management**
  Reduce potential financial liabilities associated with data breaches and non-compliance.

- **Strategic Insights**
  Gain valuable insights into your data security that support informed decision-making and operational improvements.
